EDUCATION

- ❖ **Bachelor of Science in Computer Science & Engineering** | American International University-Bangladesh (Fourth Semester) *CGPA: 3.69 | (Join Fall-2023)*
 - Relevant Coursework:**
 - **Programming in C++:** Basics, functions, and OOP fundamentals (*Fall-2023*),
 - **Java OOP:** Classes, inheritance, and application development (*Spring-2024*),
 - **Discrete Math:** Logic, sets, and graph theory (*Summer-2024*),
 - **Oracle Database:** Fundamentals of SQL, PL/SQL programming, and database design (*Fall-2024*)
- ❖ **Higher Secondary Certificate (Science)** | Milestone College, Uttara *GPA:5.00 | PASS: 2022*
- ❖ **Secondary School Certificate (Science)** | I.E.S. Uchcha Madyamic Bidyalaya *GPA:5.00 | PASS: 2020*

SKILLS

- ❖ **MERN Stack Website Developer**
- ❖ **JavaScript | React JS | Node JS | Express JS | MongoDB | Mongoose**
- ❖ **C (Basic)**
- ❖ **C++ (Basic)**
- ❖ **Java (Basic)**
- ❖ **Languages:** Bangla (native), English (fluent), Hindi (proficient in listening, basic speaking)

PROJECTS

❖ **Personal Portfolio**

Technologies: HTML | CSS | BOOTSTRAP | JAVASCRIPT | NODE JS | EXPRESS JS | MongoDB

Details: A dynamic full-stack web application featuring sections for home, about, projects, contact, and blog. Includes a contact form for user messages and a review section for feedback with images. Built using frontend, backend, and database technologies for a seamless user experience.

❖ **Nihongo Blossom: A Japanese Vocabulary Learning Platform**

Technologies: HTML | CSS | TAILWIND CSS | JAVASCRIPT | REACT | NODE.JS | EXPRESS.JS | MONGOOSE | FIREBASE | JWT AUTHENTICATION

Details: Nihongo Blossom is a Japanese vocabulary learning platform built with the MERN stack, designed to enhance the language-learning experience with an intuitive and responsive interface. The project includes features like lesson-specific vocabulary tracking, Firebase-based authentication, and admin controls for managing users and permissions. A key challenge was implementing user-specific lesson completion tracking without affecting others, and securely enabling admin access for designated users to manage protected routes efficiently. Overcoming these hurdles ensured a robust and user-friendly system, showcasing advanced development skills and attention to detail.
